Vladimir Sh. YUSUFOV

OPEN AND OPEN-COVERING MAPPINGS OF TOPOLOGICAL SPACES

Abstract

The given paper is the second part of the large paper, divided into four papers, one of which has already been published [7].

The present paper consists of two paragraphs, the first of which is devoted to open (is not necessarily continuous) mappings, and the second paragraph is devoted to open-covering and open open-covering mappings, whose importance of researches is confirmed by propositions 13 and 14.
