

Semi-annual report of the Proceedings of the Institute of Mathematics and Mechanics for 2024

During the reporting period, the first issue of volume 50 of the Proceedings of the Institute of Mathematics and Mechanics was published. This issue contains 12 articles of authors from Azerbaijan, Turkey, Algeria, Russia, Uzbekistan, Poland, and France.

The first issue of volume 50 includes the following articles:

<u>On the completeness of eigen and associated vectors of a class of third order quasi-elliptic operator pencils</u>	3 – 20
by Sabir S. Mirzoyev and Aydan T. Gazilova	
<u>Control of loaded points of a parabolic equation</u>	21 – 38
by Vagif M. Abdullayev and Vugar A. Hashimov	
<u>A study of one approach to solution of the first-order non-linear impulsive differential equations with multipoint boundary conditions</u>	39 – 52
by Misir J. Mardanov and Yagub A. Sharifov	
<u>Balayage theorems for connectedness problems in uniformly convex spaces</u>	53 – 61
by A. R. Alimov	
<u>Solving a class of quasilinear first order PDE</u>	62 – 77
by Samiha Djemai and Salim Mesbahi	
<u>The Cauchy problem for the modified Korteweg-de Vries-Liouville (mKdV-L) equation with an additional term in the class of periodic infinite-gap functions</u>	78 – 95
by Aknazar Khasanov, Ulughbek Khudayorov and Temur Khasanov	
<u>One example of singular representations of real numbers from the unit interval</u>	96 – 103
by Symon Serbenyuk	
<u>Nodal solutions of some nonlinear fourth-order boundary value problems</u>	104 – 114
by Yagut N. Aliyeva	
<u>The representation problem for a diffusion equation and fractal R-L ladder networks</u>	115 – 125
by Jacky Cresson and Anna Szafranska	
<u>Determination of a spacewise dependent heat source in biharmonic heat equation from final temperature measurements</u>	126 – 132
by Mansur I. Ismailov	
<u>Discrete dynamics on locally conformal framework</u>	133 – 151
by Ogul Esen, Ayten Gezici and Hasan Gumral	
<u>On the error of approximation by RBF neural networks with two hidden nodes</u>	152 – 161
by Aida Kh. Asgarova and Ibrahim K. Maharov
