

## CONTENT

Akhundov A.Ya., Gasanova A.I. <i>Determination of the coefficient in the right side of the system of reaction-diffusion type in the problem with a nonlinear boundary condition ...</i>	3
Babayev A. M-B. <i>Best approximation of Lipschitz class functions .....</i>	9
Guliyeva V.F. <i>Existence of global solution of Cauchy problem for a class system of semi-linear hyperbolic equations with damping of fourth order .....</i>	13
Heydarov A.H., Mamedov M.N. <i>Spectral analysis of Sturm-Liouville operator on a semi-axis with <math>\delta'</math>-potential .....</i>	21
Isayeva S.E. <i>The existence of an absorbing set for one mixed problem with hysteresis ...</i>	27
Ismailov M.I. <i>On perturbation of b-basis in Banach spaces with respect to CB-space .....</i>	35
Mamedov E.Sh. <i>On one property of operator bundles of multiparameter spectral problem .....</i>	41
Mamedov F.I., Mamedova F.M. <i>A Hardy type general inequality in <math>L^{p(\cdot)}(0,1)</math> with decreasing exponent .....</i>	45
Mammadov Y.A., Gadjiev T.S., Rasulov R.A. <i>On behavior of solutions of nonlinear parabolic equations .....</i>	51
Rahimov F.H., Navidi M. <i>On uniformly integrability of family of some normalized boundary functionals associated with nonlinear boundaries crossing by random walk ...</i>	57
Sadygov M.A. <i>Characterization of <math>n</math>-positive homogeneous function .....</i>	63

## MECHANICS

Gadjiev V.D., Jafarov Kh.G. <i>On non-homogeneous underground pipelines stability .....</i>	85
--	----

Mamedli R.E.  
*About the stability of nonhomogeneous three-layer rods under uneven  
 temperature in an nonlinear elastic foundation* ..... 89

Mustafayev A.B.  
*Investigation of curvilinear crack stimulation of thermoelastic stress field* ... 95

## APPLIED PROBLEMS OF MATHEMATICS AND MECHANICS

Abdullaev V.M.  
*Numerical solution to some inverse nonlocal boundary-value problems* ..... 105

Najafov M.A.  
*Mathematical statement of the flutter problem* ..... 115

Niftiyev A.A., Hashimov S.A.  
*Elliptic equation relative to domain evolution* ..... 121
