

## CONTENT

### MATHEMATICS

Aliev B.A.

*Solvability of boundary value problem for second order elliptic differential-operator equation with spectral parameter in the equation and boundary conditions* ..... 3

Delshad Gharehgheshlaghi A.Y.

*A boundary value problem for a composite type third order equation under multiplicity condition of characteristic equation roots* ..... 27

Dzhabarzadeh R.M., Salmanova G.H.

*About solutions of algebraic systems* ..... 43

Fatemi M., Aliev N.

*A boundary value problem for an ordinary general integro-differential, loaded equation of second order with non-local and global terms in the boundary conditions* ..... 49

Hajiyev A.H., Jafarova H.

*Mathematical models of complex queues and their applications* ..... 57

Ibrahimov E.J., Jafarova S.A.

*On approximation of functions by Gegenbauer singular integrals* ..... 67

Ibrahimov T.T.

*On some a priori estimates for quasilinear parabolic equations* ..... 79

Ismailov M.I.

*On  $b$ -Bessel systems* ..... 89

Jafarov S.Z.

*On moduli of smoothness in Orlicz classes* ..... 95

Khalilov V.S.

*The limit theorem and the number of particles in multi-type branching processes with migration* ..... 101

Kurbanov V.M., Ismailova A.I.

*Equiconvergence theorems for expansion by the root-functions of Dirac operator* ..... 111

Mammadova L.I. <i>Representation of the solution of Sturm-Liouville equation with discontinuity conditions interior to interval</i> .....	127
--------------------------------------------------------------------------------------------------------------------------------------------------	-----

Muradov T.R., Sadygova S.R. <i>On a Banach generalization of Kato theorem on basicity of close systems</i> .....	137
-------------------------------------------------------------------------------------------------------------------------	-----

Nacafov T.I. <i>Notion of <math>n</math> - analytic function and <math>n</math> - exponent</i> .....	141
---------------------------------------------------------------------------------------------------------	-----

Rahimov F.G., Hashimova T.E. <i>Asymptotic behavior of the mean value of intersection time of nonlinear boundaries by a random walk</i> .....	149
------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Salmanov V.F., Mirzoev V.S. <i>On basicity of a system of functions in the space <math>W_p^1(0, \pi)</math></i> .....	153
--------------------------------------------------------------------------------------------------------------------------	-----

Shykhamedov A.M., Farahani S. <i>On a basis from perturbed systems of exponents</i> .....	157
----------------------------------------------------------------------------------------------	-----

## MECHANICS

Guliev M.S. <i>On the axisymmetric wave propagation in the initially twisted circular compound cylinders (soft inner and stiff external cylinders)</i> .....	163
---------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Kazimova R.A. <i>Corrosive failure of elliptic bar under the action of torque</i> .....	177
--------------------------------------------------------------------------------------------	-----

Panahov G.M., Aliyev Q.A., Veliyev N.A., Najafkuliyevev N.B. <i>Estimating active gas in underground gas storages subject to adsorptional properties of a reservoir and interformational cross flow conditions</i> .....	179
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

SADIG HUSEYINALI VALIYEV .....	183
--------------------------------	-----
